

## CTPAE Tubular & Open Width Knitted Raw Fabric Inspection and Rolling Machine

Fabric inspection and rolling machine to handle a wide range of raw tubular and open width knitted materials. This system operates from roll to roll.

- Ergonomically designed
- Fast and easily handled, requires only one operator
- Improves material quality
- Synchronizes production processes
- Reduces administration

### Simple fabric input control

Fabric input controlled from motor driven rollers for simple and effective control.

### Simultaneous control of both sides - Twin inspection screen

Both sides of the fabric can be examined with the aid of different viewing and lighting options.

### Adjustable tension

Manually adjustable tension of fabric when rewinding.

### Aerial spreading system with spiral rollers

Uniform rolling by spiral spreading rollers with high speed separate motors and pressurized air backup for completely spreading the curled edges.

Technical Specifications	
Speed	0 to 40 meters / minute
Fabric width	1.3 - 2.35 meter
Standard roll diameter	50cm
Standard roll weight	50 Kg
Overall machine height	220cm
Overall machine width x depth	300 x 200cm
Overall machine weight	600Kg
Motor Count	3 AC
Electrical requirement	220V - 240V AC 50Hz 3 Phase
